

I'm a long distance truck driver. I'm not in a city long enough to get a weather update on regular radio stations. I'm past the city and out of radio range before they finish playing the music and doing commercials and finally getting around to the weather. This weather channel on XM radio would greatly benefit not only truck drivers, but any person traveling and needing instant weather updates. I think XM Radio is the best thing to come along since personal computers. Please reject NAB petition 04-160 and allow XM radio to get on with the business of providing the public with what they want.
